MULATU JALETA ABDETA

Full-Stack Software Engineer

Injibara, Amhara, Ethiopia | Open to remote contract & freelance work

PROFILE

Fourth-year Software Engineering student and full-stack developer who builds production-ready web applications, scalable backends and distributed systems with TypeScript, the MERN stack and Java. Experienced in database design, network programming (Java RMI, sockets) and machine learning classification pipelines. Available for remote contract work at 40 hours per week, with core-hours overlap for US Eastern Time (7 AM–12 PM EST).

SELECTED PROJECTS

IU-LEMMS Lab Management System

TypeScript · MERN Stack · MongoDB · UML

Replaced manual tracking of university laboratory equipment, which caused missing inventory records and slow audits. Designed a full-stack tracking platform with structured MongoDB schemas, modular architecture and TypeScript workflows, reducing administrative overhead.

github.com/mulatumuler82-ui/lab-equipment-system

Distributed Banking Protocol

Java RMI · Sockets · JDBC

Built a client-server prototype for secure, concurrent remote procedure calls across distributed server nodes, covering network synchronisation and stub-skeleton mechanics for reliable, thread-safe transactions.

github.com/mulatumuler82-ui/try-git

Personal Cost Management App

PHP · MySQL · Bootstrap

Web-based personal finance tracker with user authentication, secure database queries and data-visualisation dashboards.

github.com/mulatumuler82-ui/cost-management-system

Loan Approval Prediction Model

Python · Scikit-Learn · Pandas

Supervised classification pipeline that evaluates financial-risk metrics using Logistic Regression, Decision Trees and Random Forests.

Developer Portfolio (this website)

React · TypeScript · Tailwind CSS · Node.js · Express

Responsive full-stack portfolio with an animated interface and a contact API that delivers messages to my inbox by email. Version-controlled on GitHub and deployed continuously on Vercel.

EDUCATION

Bachelor of Science in Software Engineering

Fourth-year, first semester · Ethiopia

GitHub
github.com/mulatumuler82-ui

Location
Injibara, Amhara, Ethiopia

TECHNICAL SKILLS

Frontend
React, TypeScript, Tailwind CSS, Bootstrap, HTML/CSS

Backend
Node.js, Express, REST APIs, PHP

Databases
MongoDB Atlas, PostgreSQL, MySQL

Distributed systems
Java RMI, Sockets, JDBC

Machine learning
Python, Scikit-Learn, Pandas

Tools & delivery
Git, GitHub, Vercel CI/CD, UML, IntelliJ IDEA, VS Code

AVAILABILITY

Remote contract, 40 hrs/week
US Eastern Time overlap (7 AM–12 PM EST)
